# THE AURABEAT RANGE

Air Quality and Pathogen Control  
for Care Environments

REDUCE YOUR  
**STAFF COSTS**  
NOT YOUR  
**STANDARD  
OF CARE**

# The Aurabeat Range - Air Quality Control for Care Homes

The Aurabeat range has been designed with the you in mind. Whether you need local virus protection for a car or personal space or a larger, multi-occupancy room, there is an Aurabeat to keep you, and those around you safe, and breathing clean, healthy air.

## The Aurabeat Portable

Personal protection for your desk, office or car

**Air quality control for your car, desk and personal space.**

- Laboratory tested as being 99.9% effective against Covid in 30 minutes for the average car
- 4 in 1 filter system. Including Silver ion to eliminate viruses, bacteria and fine particles
- Takes up minimal space on a desk or in work area. Fits in the cup holder of a car.
- Air quality indicator

## The Aurabeat Cube

The clean air solution for small to mid size areas

**Air quality control for your car, desk and personal space.**

- Laboratory tested as being 99.9% effective against Covid
- 4 in 1 filter system. Including Pre filter
- AG + Silver Ion Antiviral Air Filter, traps and destroys viruses
- Ionizer traps dust, allergens and other free floating particles
- Activated Carbon Filter for fresher air

# The Aurabeat Vertical

With its **5 in 1 filtration process, air quality indicator and built in silver ion anti-viral protection**, the Aurabeat Vertical is the most cost-effective, reliable and non-chemical solution to your air quality problems. The strong, yet unobtrusive, fan draws in harmful pollution and pathogens from the air and rapidly cleans them from your environment. Then, by utilising the **plasma and ultraviolet** options, Aurabeat it will not only inhibit the spread of viruses in enclosed spaces, but it will also clean and refresh the air. In fact, the Vertical is **fully tested under independent laboratory conditions to eliminate 99.9% of all common viruses** (including Covid-19 and Norovirus). The low maintenance filtration system and will also eliminate common fungal and bacterial threats as well as air pollution from traffic and other sources.

An Aurabeat vertical gives you the peace of mind of knowing that you are in a low infection risk, healthy, environment...

with clean air for everyone.

SGS testing verified with **99.9% kill rate** of bacteria and viruses

Light touch, easy to use control panel

**AG+ silver** Eliminates viruses, bacteria and moulds

**Photocatalytic**  
Removes gas pollutants

**Ultra Violet**  
Sterilises the air and eliminates viruses

**Plasma**  
Destroys microorganisms

 OZOFRESH™

# How much could an Aurabeat save you if it prevents even a small virus outbreak a care home?

Assuming you only need to cover 3 infected staff with agency workers for just 5 days, it will cost between £1500 and £2500. Add to this the cost of salaries for the team members who are off sick and other factors such as the loss of productivity, manager duties, admin etc, and that figure rises to a total of £3500 to £5800

**With a 99.99% effectiveness, Aurabeat could return your investment on the first outbreak and save you thousands in staff costs.**

If it does that just three times during flu season your bottom line spend could decrease by **£10,000 to £17,000.**

No wonder so many care homes are turning to Aurabeat Verticals to improve their air quality.
